

UNICA TOKEN PVT LTD

8th August 2022

TO WHOM IT MAY CONCERN

This is to certify that Mr. Advay Kajaria, S/o Mr. Sharad Kajaria, resident of 15B/1A Raja Santosh Road, Alipore, Kolkata-700027 had been engaged in our organization as an Intern.

Yunometa is a web 3.0 organization working with Metaverse, Blockchain and Smart-contracts. He was engaged with our organization from the 10th of June 2022 to 24th of June 2022.

During his internship with Yunometa, Advay was given daily tasks which helped him develop his understanding of tables, graphs and reports. He also worked on finalizing reports and preparing them for presentation to the clients. His involvement with various projects also helped him understand what the Metaverse is and how NFTs work.

Advay worked on projects for many of Yunometa's clients such as Mahindra Holidays and Thinkitchen, which helped him in developing his understanding of how these companies want to integrate themselves with the Metaverse.

During his term with us I was most struck by Advay's focus and work ethic, two attributes that are uncharacteristic of boys his age. I was particularly impressed by his enthusiasm and his interest in trying to learn new things. While he was initially outside of his comfort zone, as he progressed through his time with us, he not only started grasping more advanced concepts, but also began approaching us with his own views on the same.

In conclusion, Advay's experience with Yunometa showed us how bright a child he is and I'm sure he will be able to use the skills he acquired working with us in his career later.
